

YOUR FINAL PRODUCT

- 🌍 You are to create a poster-sized 3D replica of your endangered species in their habitat.
- 🌍 You may choose any materials to create this poster-sized 3D replica. Examples include (but are not limited to) Legos, modeling clay, paper maché, anything goes! These are not to be prefabricated kits of endangered species. You have to provide your own materials though. Let your imagination soar!
- 🌍 Your 3D replica will include characteristics of your endangered species habitat.
- 🌍 Your 3D replica will also include an infographic type poster with facts, figures, and graphics about your endangered species. It will also include ways you have thought about to save your endangered species.
- 🌍 You will create a picture for your endangered species to be used as a passport stamp for visitors to collect when viewing your 3D replica.
